

SiltSoxx Sediment Control

for Runoff Protection superior to Silt Fence

SiltSoxx compost filter socks utilize the natural filtering properties of compost and the durability of woven polypropylene mesh to create a sediment trap superior to silt fence.

Quick Installation - just roll it out and stake it down

No Trenching - save time by avoiding the level trench needed for silt fence

No Landscaping Damage - SiltSoxx can go between trees and bushes with no damage

Quick Cleanup - just cut the top and let the compost spill out - throw away only the sock

Install on Pavement - unlike fencing, this can be rolled out on pavement, providing quick protection along roads or around catch basins

Available on pallets in:
8" x 150' rolls,
(10)8" x 10' lengths,
12" x 85' rolls or
(10)12" x 10' lengths
(includes stakes)
